

**SPECIAL EDITION – CONSTRUCTION MANAGEMENT AND
ECONOMICS & INFORMATION AND COMMUNICATION
TECHNOLOGY IN CONSTRUCTION**

The Brazilian journal Ambiente Construído will produce in 2024 a ***Special Edition on Construction Management and Economics & Information and Communication Technology in Construction***. This is another articulated action of the journal with one of ANTAC's Working Groups, aiming to contribute to the improvement of the quality of congresses in the area.

The paper accepted for this Special Edition will be invited to presentation in a Special Technical Section during the 13rd Brazilian Conference in Construction Management and Economics & 4th Brazilian Symposium on Information and Communication Technology in Construction, that will take place in Aracaju, Sergipe, Brazil, from 08 to 10 November 2023. The articles can be submitted in Portuguese, Spanish and, preferably, in English.

The main theme of the event in 2023 will be: **Industry 5.0: opportunities and challenges for the construction industry**. Therefore, within this theme, papers related to Construction Management and Economics will be accepted in the following lines:

- Organizational and Strategic Management
- Production Management
- Management of Contracts and Acquisitions
- Quality Management
- Cost Management
- Risk Management
- Industry 4.0 and 5.0 in construction
- Construction Management Teaching
- Knowledge and Information Management
- Innovation Management

- Maintenance and Operations Management
- Sustainability Management in Companies and Construction Sites
- Supply Chain and Logistics Management
- Occupational Health and Safety Management

And related to Information and Communication Technology in Construction in the following lines:

- ICT in the development of building and infrastructure projects
- ICT in construction planning and production
- ICT in knowledge management, integration and collaboration
- ICT in the management and operation of buildings and infrastructure
- ICT in the development of cities and public management
- ICTs in teaching
- Artificial intelligence in Architecture, Engineering, Construction and Operation
- Industry 4.0 and 5.0 in the design and operation of projects

All articles will be evaluated according to the usual procedures of the Journal by three evaluators of the journal Review Board, according to the following schedule:

(a) Papers submission due to **29.04.2023**

(b) Evaluation by the Editorial Board due to **30.08.2023**

(c) Special Edition Publication: N1 V24

We inform that articles that do not receive a final opinion from the Editors until 08/30/2023, will be sent to the continuous flow of Revista Ambiente Construído and will not be published in the Special Edition. This measure is necessary to be able to meet the internal deadlines for editing articles for publication in the N1 V.24 Edition.
