v. 9, n. 2, July/Dec., 2025

EDITORIAL

This second issue of 2025 brings eight original articles concerning the analysis of a variety of matrixes, which highlights the broad application of the analytical tools in the pharmaceutical sciences. National and international researchers have contributed for the success of this issue. The editorial team would like to thank all authors, editors and reviewers of volume 9 for the support. The challenges of visibility and dissemination will keep on next year.

We wish you all an excellent reading and a happy 2026!

PUBLISHER'S INFORMATION

Drug Analytical Research is a scientific publication of Faculdade de Farmácia da Universidade Federal do Rio Grande do Sul (**UFRGS**). It is an open access journal that publishes two issues per year, focused on publication of **review** and **original articles** in all relevant areas of **analytical and bioanalytical chemistry applied to pharmaceutical sciences**. The articles published by the journal are directed to researchers, undergraduate and graduate students, with the aim of disseminating the knowledge and application of analytical techniques in the analysis of drugs as well as promoting the scientific development of the analytical area in Pharmaceutical Sciences.

For submissions, it is necessary to log in as author and use the **TEMPLATE**, which contains the Instructions for Authors (www.seer.ufrgs.br/dar).

This journal does not have processing or publication charges as employ the Open Journal Systems (OJS) an open-source software application for managing and publishing scholarly journals.
