

### Letter to the Editorial Committee

This document must be filled in by the author responsible for the submission of the article and must contain the data of all the other authors of the work. All fields are required. Completion of this document does not exempt authors from completely filling in the submission form and their respective user profiles in the journal's system. Manuscripts that are not accompanied by this letter correctly filled out will not be forwarded for evaluation. In the section 'checklist for submission', the authors should, in the event of marking "no" in any of the answers, present a justification and/or pertinent clarifications in the field reserved for that purpose.

#### First author information

Full name:

Declarations of responsibility:

---

I take full responsibility for the content of the manuscript submitted to the editorial committee of Conjuntura Austral.

I have the authorization of the co-authors of this work in everything that concerns the publication of the manuscript, and everyone is aware and in accordance with the order of authorship presented here, as with the respective collaboration roles indicated.

The content of the work submitted to the journal does not contain anything that can be considered illegal or defamatory, that creates a conflict of interest or that can interfere with its impartiality and scientific nature.

---

**Second author information**

If there is no second author, do not fill in the fields

Full name: \_\_\_\_\_

### Open Science Compliance Form

Through this form, the authors inform *Conjuntura Austral: journal of the Global South* about the conformity of the manuscript with Open Science communication practices.

#### Preprints

---

Is the manuscript a preprint?

Yes Preprint server:

Preprint DOI:

No

#### Research Data and other Materials Availability

---

Authors are encouraged to make available previously or at the time of publication all content (data, software codes and other materials) underlying the manuscript text. Exceptions are allowed in cases of legal and ethical issues. The objective is to facilitate the manuscript evaluation and, if approved, contribute to preserving and reusing the contents and research reproducibility.

Are the contents underlying the manuscript text already available in their entirety and without restrictions or will they be at the time of publication?

Yes the contents underlying the research text are included in the manuscript

the contents are already available

the contents will be made available at the time of publication of the article

Titles and respective URLs, access numbers or file DOIs of the contents underlying the article text follow below (use one line for each data):

No data is available on demand from referees

after publication the data will be available on demand to authors – a condition justified in the manuscript

data cannot be made publicly available.

Justification:

#### Open peer review

---

When offered the option, authors agree with the publication of review reports of the approved manuscript?

Yes No

When offered the option, authors agree to interact directly with reviewers responsible for evaluating the manuscript?

Yes No

**Checklist for submission**

**Essential elements**

The manuscript, excluding references, has between 15 thousand and 25 thousand characters, in case of being a Scenario Analysis, between 35 thousand and 50 thousand characters, in case of being a Research Article, and between seven thousand and nine thousand characters in case of being a Bibliographic Review?	Yes	No
Does the manuscript contain at least three keywords in the original language?	Yes	No
Does the manuscript contain at least three keywords in a second language?	Yes	No
Does the manuscript have a title in the original language?	Yes	No
Does the manuscript have a title in a second language?	Yes	No
Does the manuscript have an abstract in the original language?	Yes	No
Does the manuscript have an abstract in a second language?	Yes	No
Justification/clarifications		

**Abstract and title**

The summary presents in a clear, synthetic and objective way:		
– The subject of the work?	Yes	No
– The objectives of the work?	Yes	No
– The methodology used in the work?	Yes	No
– The conclusions of the work?	Yes	No
Does the abstract have between 150 and 200 words?	Yes	No
Is the title of the paper clear and objective and has less than 200 characters long (including spaces)?	Yes	No
Justification/clarifications		

**Format**

Does the manuscript have sections of introduction, conclusions, and references, and is it not excessively fragmented?	Yes	No
Are the footnotes composed only of additional information, without presenting bibliographic references and links (which must appear in the final references of the work)?	Yes	No
Are the references in the body of the text in the formats Author (Date), (AUTHOR, Date) or (AUTHOR, Data, p.XX), in the case of direct citations?	Yes	No
Is the list of references composed only of references indicated in the body of the text?	Yes	No
Are the references formatted according to the Guidelines for authors of the journal?	Yes	No
Justification/clarifications		

**Content**

In case there are tables, charts, and flowcharts in the work, they are editable and inserted in the body of the text, with appropriate titles, captions, and references, not as images or at the end of the text, as attachments.	Yes	No
In the case of using images, these were not included in the body of the text, having only their location indicated, and will be sent as complementary files in .jpeg format with a minimum resolution of 300 dpi. In the event that they were not produced by the authors of the manuscript, they have an express authorization to use images protected by copyright and copyright contained in the article, which will be sent as a supplementary document.	Yes	No

Justification/clarifications

Acknowledgements

Briefly describe the article's research question

Briefly describe the article's methodology

Briefly describe the theoretical approach adopted in the article

Briefly describe the main contributions of the article

**Confirmation**

The authors confirm that the manuscript falls within the scope of *Conjuntura Austral: journal of the Global South* as well as that it fully meets all the criteria established in the journal's [Guidelines for Authors](#).

The authors confirm that the manuscript was not submitted to any other journal simultaneously.

Additional Information:

## Annex

### Contributor Roles Taxonomy

The Contributor Roles Taxonomy (CRediT), developed by Consortia Advancing Standards in Research Administration (CASRAI) National Information Standards Organization (NISO), is high-level taxonomy, including 14 roles, that can be used to represent the roles typically played by contributors to scientific scholarly output. The roles are not intended to define what constitutes authorship, but instead to capture all the work that allows scholarly publications to be produced.

In this spirit, all contributions should be listed, whether from those listed as authors or individuals named in acknowledgments; individual contributors can be assigned multiple roles, and a given role can be assigned to multiple contributors; corresponding authors should assume responsibility for role assignment, and all contributors should be given the opportunity to review and confirm assigned roles.

<b>Conceptualization</b>	Ideas; formulation or evolution of overarching research goals and aims.
<b>Data curation</b>	Management activities to annotate (produce metadata), scrub data and maintain research data (including software code, where it is necessary for interpreting the data itself) for initial use and later re-use.
<b>Formal analysis</b>	Application of statistical, mathematical, computational, or other formal techniques to analyze or synthesize study data.
<b>Funding acquisition</b>	Acquisition of the financial support for the project leading to this publication.
<b>Investigation</b>	Conducting a research and investigation process, specifically performing the experiments, or data/evidence collection.
<b>Methodology</b>	Development or design of methodology; creation of models.
<b>Project administration</b>	Management and coordination responsibility for the research activity planning and execution.
<b>Resources</b>	Provision of study materials, reagents, materials, patients, laboratory samples, animals, instrumentation, computing resources, or other analysis tools.
<b>Software</b>	Programming, software development; designing computer programs; implementation of the computer code and supporting algorithms; testing of existing code components.
<b>Supervision</b>	Oversight and leadership responsibility for the research activity planning and execution, including mentorship external to the core team.
<b>Validation</b>	Verification, whether as a part of the activity or separate, of the overall replication/reproducibility of results/experiments and other research outputs.
<b>Visualization</b>	Preparation, creation and/or presentation of the published work, specifically visualization/data presentation.
<b>Writing (original draft)</b>	Preparation, creation and/or presentation of the published work, specifically writing the initial draft (including substantive translation).
<b>Writing (review &amp; editing)</b>	Preparation, creation and/or presentation of the published work by those from the original research group, specifically critical review, commentary or revision – including pre- or post-publication stages.
